

GÜNEY URAL

Software Developer | Full-stack, iOS, Android, AI

Istanbul, Türkiye | guneyural@gmail.com | guneyural.com | linkedin.com/in/guney-ural | github.com/guneyural

SUMMARY

Software developer with 5 years of experience in web, mobile and backend development. Builds and runs Kazık Yer Miyim?, an AI assistant for used car buyers in Türkiye with 33,000+ users and a 4.5/5 rating from 270+ ratings on the App Store and Google Play. It ranked #1 several times in Auto & Vehicles on Google Play and as high as #8 in Utilities on the App Store in Türkiye.

EXPERIENCE

Creator & Software Developer

Apr 2026 – Present

Kazık Yer Miyim?, kazikyermiyim.com

Istanbul, Türkiye

- Built an AI assistant for used car buyers that grew to 33,000+ users and a 4.5/5 rating from 270+ ratings. It ranked #1 several times in Top Free Auto & Vehicles on Google Play and as high as #8 in Utilities on the App Store in Türkiye, and still ranks in both charts.
- Shipped native iOS (Swift, SwiftUI) and Android (Kotlin, Jetpack Compose) apps and a Next.js web app, all on one shared backend.
- Built the Node.js and TypeScript backend with real-time chat (Socket.IO), Redis and AI features that analyze car photos and listings.
- Designed privacy-first data handling: user conversations and images are encrypted with AWS Key Management Service (KMS), in line with the Turkish data protection law (KVKK).
- Built subscription and credit payments with iyzico and Apple In-App Purchase.

Full-stack Software Developer

Mar 2025 – Present

GG Tech

Istanbul, Türkiye (Hybrid)

- Çekmeköy Belediyesi** (cekmekey.bel.tr, live since Jun 2026): Designed the frontend architecture and built the municipality's citizen website and full staff CMS with 230+ pages (Next.js, React, TypeScript, Redux Toolkit). The CMS runs every section of the site, from news, tenders and corporate pages to event ticketing with seat plans, box office sales and QR ticket validation, all behind role-based access control.
- Çekmeköy Belediyesi Mobile** (iOS and Android, live since Jul 2026): Connected the Flutter app to live APIs to match the website and prepared it for the App Store and Google Play.
- beyondreview.ai** (AI review management SaaS): Built most of the Node.js backend as a full-stack developer: Google Business Profile integration for multi-account review sync, an AI review reply engine on Google Gemini with automatic, hybrid and manual modes, approvals over Slack and WhatsApp (Twilio) and Stripe billing. Also managed the DevOps processes (production server, CI/CD).
- nextt.io** (HR recruitment platform, 5,000+ student applications): Led the technical design and built the platform with the team from the first release to the last (Next.js, MongoDB, NextAuth), including auth, candidate profiles, the application flow and encrypted personal data.
- Indoor positioning R&D**: Leading, with a senior consultant, a BLE beacon system (React Native, Swift, Kotlin) for staff analytics (time per zone, density heatmaps, break tracking) and indoor wayfinding for visually impaired people.
- Also built real-time messaging for basariplatformu.com (Socket.IO, Redis), iyzico marketplace payments for a QR menu ordering SaaS, and the new GG Tech website from Figma.

Software Developer

Jan 2024 – Mar 2025

Codenra

Istanbul, Türkiye (Remote)

- Built the alicilar.com mobile app with React Native, from the first commit to App Store release.
- Integrated iyzico payments for the web and for in-app purchases on iOS and Android.
- Shipped features and performance fixes for the web and mobile apps (React, React Native, Node.js).

Software Developer

Jun 2021 – Mar 2024

Kırklareli Gazetesi, kirkclareligazetesi.com.tr

Hybrid

- Built the newspaper's website with Next.js to meet the rules of the Press Advertising Agency (Basın İlan Kurumu). This qualified the site for official government ads and a new source of revenue.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Swift, Kotlin, Python, HTML, CSS

Frameworks: React, Next.js, React Native, Flutter, Node.js, Express, SwiftUI, Jetpack Compose, Tailwind CSS

AI: OpenAI API, Google Gemini, AI agents, retrieval-augmented generation (RAG), vision models

Backend and Cloud: MongoDB, Redis, Socket.IO, AWS (KMS, S3), Firebase, Docker, Linux, CI/CD, Vercel

Integrations: iyzico, Stripe, Apple In-App Purchase, Twilio, Slack API, Google Business Profile API
